

SHIFTED FREIGHT REWORK

Pace **SFR** reorganizes freight that has shifted in transit and includes:

- Unloading the affected cargo
- Assessing the cause of the shift
- Reloading the freight to ensure proper balance and stability

Pace **SFR** professionals understand how to restore and maintain the integrity of the cargo, prevent further damage or loss, and ensure timely delivery to its final destination. Cross-docking and storage facilities as well as middle and final mile services are available.
